

How the CIC Online Course Sharing Consortium Helps:

Retain and Graduate More Students

Increase retention and on-time graduation

Course sharing helps colleges and universities improve student retention and graduation rates by allowing students to stay enrolled and on track when scheduling conflicts, family issues, work commitments, or other factors might otherwise force them to stop out and potentially even drop out.

The flexibility afforded by course sharing helps institutions give students more options to accelerate their progress. In addition, all courses are transcribed at the Home Institution, so courses can satisfy residency requirements.

"Using [CIC-OCSC] courses **helps students maintain progress** towards a degree, keeps them connected to our college, keeps them connected academically...and ultimately **increases the chances of students coming back** the next semester."

— Dr. Jonathan Brand, President of *Cornell College*
